SECTION – A

Answer any **FIVE** of the following.   (5x2=10)

1. What is meant by Big Data analytics?

2. A company produces and sells a single product whose variable cost is $6 per unit. Fixed costs have been absorbed over the normal level of activity of 200,000 units and have been calculated as $2 per unit.
   The current selling price is $10 per unit.
   How much profit is made under marginal costing if the company sells 250,000 units?

3. State the features of Time related systems of Remuneration.

4. If Σx= 440, Σy = 330, $\Sigma x2$ = 17,986, $\Sigma y2$ = 10,366, Σxy = 13,467 and n =11, Calculate the value of coefficient of correlation.

5. $450 is invested in an account earning 6.25% interest p.a.
   Calculate the fund value after 12 years.

6. A company uses standard marginal costing. Last month the standard contribution on actual sales was $44,000 and the following variances arose:

Total variable costs variance	$6,500 Adverse
Sales price variance	$2,000 Favorable
Sales volume contribution variance	$4,500 Adverse

   What was the actual contribution for last month?

7. A truck carries goods from point A to B having a distance of 10 Kms. The total weight is 150 tones. Cost incurred from point A to B is $1,25,000. Calculate the cost per tone kms.

SECTION - B

Answer any **FOUR** of the following.   (4x5=20)

8. Explain the different types of costs classification on the basis of function and behaviour.

9. Watton Ltd is a retailer of beer barrels. The company has an annual demand of 36,750 barrels. The barrels cost $12 each. Fresh supplies can be obtained immediately, but ordering costs and the cost of carriage inwards are $200 per order. The annual cost of holding one barrel in inventory is estimated to be $1.20. The economic order quantity has been calculated to be 3,500 barrels.

8

The suppliers introduce a quantity discount of 2% on orders of at least 5,000 barrels and 2.5% on orders of at least 7,500 barrels.

Determine whether the least-cost order quantity is still the EOQ of 3,500 barrels.

10. A company budgets to make 40,000 units of Product DOY in 4,000 hours in a year.

Actual output during the year was 38,000 units which took 4,180 hours to make.

Calculate the labour efficiency, capacity and production volume ratios.

11. Blossom Ltd manufactures and sells garden statues.

The budget and actual results for materials in November are as follows:

Budget production of 7,500 units using 22,500 kg costing $90,000.

Actual production 6,500 units,

20,800 kg of material purchased costing $91,520.

There was no opening inventory of raw materials at the start of November but there were 500 kg of closing inventory at the end of November.

Calculate the material price variance, the material usage variance and the valuation of the closing inventory at standard cost.

12. A business operates a job costing system and prices its jobs by adding 20% to the total cost of the job. The prime cost of a job was $6,840 and it had used 156 direct labour hours. The fixed production overheads are absorbed on the basis of direct labour hours. The budgeted overhead absorption rate was based upon a budgeted fixed overhead of $300,000 and total budgeted direct labour hours of 60,000. What should the job be sold for?

13. The forecast sales for an organisation are as follows:

	January $	February $	March $	April $
Sales	6,000	8,000	4,000	5,000

All sales are on credit and receivables tend to pay in the following pattern:

	%
In month of sale	10
In month after sale	40
Two months after sale	45

The organisation expects the rate of irrecoverable debts to be 5%.

Calculate the forecast cash receipts from receivables in March & April.

SECTION – C

Answer any <u>TWO</u> of the following. (2x15=30)

14. Chapel Ltd. manufactures a chemical protective called Rustnot. The following standard costs apply for the production of 100 cylinders:

Materials	500 kg @ $0.80 per kg	400
Labour	20 hours @ $1.50 per hour	30
Fixed overheads	20 hours @ $1.00 per hour	20
		450

Chapel Ltd. uses absorption costing.

The monthly production/sales budget is 10,000 cylinders sold at $6 per cylinder.

For the month of November the following actual production and sales information is available:

Produced/sold		10,600 cylinders
Sales value		$63,000
Material purchased and used	53,200 kg	$42,500
Labour	2,040 hours	$3,100
Fixed overheads		$2,200

A) Calculate the following variances for November:

1. Sales volume variance
2. Sales price variance
3. Materials price variance
4. Materials usage variance
5. Labour rate variance
6. Labour efficiency variance

15. A factory consists of two production cost centres (P and Q) and two service cost centres (X and Y). The total allocated and apportioned overhead for each is as follows:

P	Q	X	Y
$95,000	$82,000	$46,000	$30,000

It has been estimated that each service cost centre does work for the other cost centres in the following proportions:

	P	Q	X	Y
Percentage of service cost centre X to	40	40	–	20
Percentage of service cost centre Y to	30	60	10	–

After the reapportionment of service cost centre costs has been carried out using a method that fully recognises the reciprocal service arrangements in the factory, what is the total overhead for production cost centre?

16. A) A company uses process costing to value its output. The following was recorded for the period:

Input materials	2,000 units at $4.50 per unit
Conversion costs	$13,340
Normal loss	5% of input valued at $3 per unit
Abnormal loss	150 units

    There were no opening or closing inventories.

    Prepare Process Account, Abnormal Loss and Gain Account and Scrap Account.

    B) A company that operates a process costing system had work-in-progress at the start of last month of 300 units (valued at $1,710) that were 60% complete in respect of all costs.

    Last month a total of 2,000 units were completed and transferred to the finished goods warehouse.

    The cost per equivalent unit for costs arising last month was $10.

    The company uses the FIFO method of cost allocation.

    Prepare Process Account and Calculate the total value of the 2,000 units transferred to the finished goods warehouse last month?

Public general hospitals originated in the almshouse infirmaries established as early as colonial times by local governments to care for the poor. Later, in the late eighteenth and early nineteenth centuries, the infirmary separated from the almshouse and became an independent institution supported by local tax money. At the same time, private charity hospitals began to develop. Both private and public hospitals provided mainly food and shelter for the impoverished sick, since there was little that medicine could actually do to cure illness, and the middle class was treated at home by private physicians.

Late in the nineteenth century, the private charity hospital began trying to attract middle-class patients. Although the depression of 1890 stimulated the growth of charitable institutions and an expanding urban population became dependent on assistance, there was a decline in private contributions to these organizations which forced them to look to local government for financial support. Since private institutions had also lost benefactors; they began to charge patients. In order to attract middle-class patients, private institutions provided services and amenities that distinguished between paying and non-paying patients and made the hospital a desirable place for private physicians to treat their own patients. As paying patients became more necessary to the survival of the private hospital, the public hospitals slowly became the only place for the poor to get treatment. By the end of the nineteenth century, cities were reimbursing private hospitals for their care of indigent patients and the public hospitals remained dependent on the tax dollars.

The advent of private hospital health insurance, which provided middle-class patients with the purchasing power to pay for private hospital services, guaranteed the private hospital a regular source of income. Private hospitals restricted themselves to revenue-generating patients, leaving the public hospitals to care for the poor. Although public hospitals continued to provide services for patients with communicable diseases and outpatient and emergency services, the Blue Cross) plans developed around the needs of the private hospitals and the inpatients they served. Thus, reimbursement for ambulatory care has been minimal under most Blue Cross plans, and provision of outpatient care has not been a major function of the private hospital, in part because private patients can afford to pay for the services of private physicians. Additionally, since World War II, there has been a tremendous influx of federal money into private medical schools and the hospitals associated with them. Further, large private medical centres with expensive research equipment and programs have attracted the best administrators, physicians, and researchers. As a result of the greater resources available to the private medical centres, public hospitals have increasing problems attracting highly qualified research and medical personnel. With the mainstream of health care firmly established in the private medical sector, the public hospital has become a "dumping ground."

VII. Lisez le texte et répondez aux questions:

Je m'appelle Peter. Aujourd'hui, je vais vous parler de mes hobbies.
En fait, il y a beaucoup de choses que j'aime faire dans la vie. Comme beaucoup de personnes, je passe beaucoup de temps à regarder des séries. En ce moment, je regarde un épisode par jour de « Dix Pour Cent ». C'est une série française que je trouve vraiment drôle.
Sinon, je suis passionné par l'astronomie depuis que je suis tout petit. Je n'ai jamais fait d'études d'astronomie, mais je suis un vrai geek. J'apprends tout en autodidacte. Je regarde souvent des documentaires scientifiques sur l'espace et l'univers.

J'aime aussi écouter de la musique. La musique que j'écoute le plus souvent est le blues. Mais j'aime bien tous les types de musiques, sauf le reggae. Enfin, ce n'est pas que je n'aime pas le Reggae. C'est juste que je n'arrive pas à écouter du reggae plus de 30 minutes. Sinon, j'écoute du jazz manouche, du rock, du hard rock et de la musique classique. J'aime aussi tout particulièrement la musique des années 60.
Je ne joue pas d'instrument de musique, je me contente de l'écouter. Mais plus tard, j'aimerais bien jouer de la basse.
Récemment, je me suis découvert une passion pour les bandes dessinées. J'ai toute une collection. Je suis en ce moment en train de lire « Black Sad », une bande dessinée espagnole. Je ne trouve pas les histoires très intéressantes, mais les dessins sont incroyables. J'aimerais bien savoir aussi bien dessiner.
Je crois que c'est à peu près tout. Et vous, quelles sont vos passions ?

A) Repondez aux questions: (1 x 7= 7)
    1. Quelle série regarde Peter en ce moment ?
    2. Qu'est-ce qui passionne Peter depuis qu'il est tout petit ?
    3. Quelle musique écoute le plus souvent Peter ?
    4. Est-ce que Peter joue un instrument de musique ?
    5. De quoi Peter est passionné récemment ?
    6. Pourquoi Peter aime Black Sad ?
    7. Quel est le contraire de drole? (Heureux, triste, jolie)

B)Dites Vrai ou Faux: (1 x 3= 3)
    1. Il regarde deux épisodes par jour.
    2. Peter ne regarde jamais les documentaires scientifiques.
    3. Peter aime aussi la musique des années 60.

VIII. Dialogue   (5x 1=5)
    1. Invitez un ami pour la festival de musique
                    OU
    2. Au magasin des chaussures

IX. Vous cherchez du travail en France. Rédigez votre CV.   (5)

16. The "Balanced Diet" is a diet that contains all of the necessary ingredients in
     nearly the required quantity. A balanced diet is one that contributes to the
     maintenance or improvement of overall health. We should eat a well-balanced
     diet that includes liquids, adequate proteins, essential fatty acids, vitamins,
     minerals, and calories. To maintain a healthy body, we must eat fresh fruits,
     salad, green leafy vegetables, milk, egg, yoghurt, and so on a regular basis.
     We need iron, calcium, sodium, potassium, and trace amounts of iodine,
     copper, and other minerals. Milk is possibly the only single item that can be
     considered a balanced diet in and of itself.
