Des gilets de haute visibilité de couleur jaune portés par les manifestants — est un mouvement de protestation non structuré apparu en France en Octobre 2018. Ce mouvement social spontané trouve son origine dans la diffusion, principalement sur les réseaux sociaux, d'appels à manifester contre l'augmentation du prix des carburants automobiles issue de la hausse de la taxe intérieure de consommation sur les produits énergétiques (TICPE).

À partir du 17 novembre 2018, la contestation s'organise autour de blocages de routes et ronds-points et de manifestations tous les samedis. Ces protestations mobilisent surtout les habitants des zones rurales et périurbaines, mais s'organisent également dans des métropoles, où se produisent plusieurs épisodes violents, notamment sur l'avenue des Champs-Élysées.

Contd...3

Rapidement, les revendications du mouvement s'élargissent aux domaines sociaux et politiques. Lors des rassemblements, le plus souvent non déclarés, plusieurs milliers de personnes sont blessées, aussi bien du côté des manifestants que des forces de l'ordre. Des associations comme Amnesty International critiquent une conduite inadaptée du maintien de l'ordre et des institutions comme l'ONU et le Conseil de l'Europe s'interrogent sur l'usage d'armes comme les LBD et les grenades de désencerclement.

Face à l'ampleur de ce mouvement, l'exécutif renonce à la hausse de la TICPE. Le président de la République, Emmanuel Macron, annonce ensuite des mesures, entérinées par la loi portant mesures d'urgence économiques et sociales, puis lance le grand débat national, à l'issue duquel il annonce de nouvelles réformes. Cette réponse ne met pas fin au mouvement : des mobilisations, moins nombreuses, persistent sous différentes formes.

Sous la présidence de François Hollande, l'instauration de la taxe carbone ne rencontre pas une forte hostilité dans l'opinion publique, le prix du pétrole étant plutôt en baisse lors de son quinquennat. Mais entre 2017 et 2018, le prix du baril passe de 40 à 80 dollars environ ; la hausse des tarifs s'élève à 28 % pour le fioul domestique, à 22 % pour le gaz naturel, à 21 % pour le diesel, à 13 % pour l'essence³. Le phénomène est amplifié par une augmentation de la taxe carbone, prévue dès sa mise en place mais que le gouvernement d'Édouard Philippe décide d'accélérer.

Alors qu'en 2017, le ministre de la Transition écologique, Nicolas Hulot, n'avait pas eu de difficultés à faire voter les hausses de la fiscalité énergétique, le débat parlementaire est beaucoup plus vif en 2018, *La Tribune* indiquant que « l'incompréhension d'une partie des citoyens provoque une véritable fronde qui se cristallise sur le prix des carburants ». Mais le gouvernement ignore les avertissements de la Commission nationale du débat public, consécutifs au débat public sur la programmation pluriannuelle de l'énergie, sur l'acceptabilité de la hausse de la taxe carbone, qu'elle juge pénalisante pour « les plus dépendants et les plus captifs aux énergies fossiles » en l'absence de refonte de la fiscalité générale.
