A European study revealed that 100% juices of fruit and vegetables are as effective as their whole fruit or vegetable counter parts in reducing risk factors related to certain diseases.

The conclusion is the result of a study designed to question traditional thinking that 100% juices play less significant role in reducing risk of both cancer and cardio-vascular diseases.

Juices are comparable in their ability to reduce risk vis-à-vis their whole fruit or vegetable counter parts. According to several researches in the united kingdom. The researchers analysed a variety of studies and that looked at risk reduction attributed to the effects of both fibre and anti-oxidants. As a result, they determined that the positive impact fruits and vegetables offered come not from just the fibre but also from the whole fruit and vegetables.

The researchers added that the positioning of fruit juices as being nutritionally inferior to whole fruits and vegetables in relationship to chronic disease development is "unjustified" and that the policies which suggest otherwise about fruit and vegetables juices, should be re-examined.

#### UNIT - IV

#### (Vocabulary and Comprehension)

**IX Read the following passage and answer all questions: (1x5=5)**

It took three long years for my coming into existence, after the idea of new currency was conceived. I was first conceived and named on 1<sup>st</sup> January 1999, when eleven European countries decided to have a new money form i.e Euro. My value was determined as per the conversion rate fixed by these countries in terms of their own currencies. On 1<sup>st</sup> January 2002, I was circulated as currency notes when twelve countries adopted me as their currency. Some countries opposed the idea of using me and initially refused to accept me. But now almost all European countries have accepted me as a valid currency. My broth Dollar who is in America, my brother Lira residing in Italy and my sister Sterling was quite jealous of me but soon they accepted my existence and started respecting me. I now enjoy a place of pride among all the currencies in the world and almost everyone accepts me freely.

**E. Read the following passage and answer the questions. Answer in a word/phrase/sentence for 1 mark questions and in 2 or 3 sentences for 2 marks questions. (6)**

The culture of nuclear families is in fashion. Parents are often heard complaining about the difficulties in bringing up children these days. Too much of freedom in demand, too much independence, overnight parties, excessive extravagance, splurging pocket money, no time for studies and family, all this is a common cry of such families. Aren't parents, themselves, responsible for this pitiful state? The basic need of a growing youth is the family, love, attention and bonding along with moral values. One should not forget that charity begins at home.

Only the reasonable demands need to be fulfilled, as there are too many expenses to be met and too many social obligations to be taken care of by the parents. Earlier there never existed the concept of old-age homes. There was a deep respect for the family elders, and love, care and concern for the youngsters. Even the minor family differences were solved amicably in the joint families.

- Mention any two major common concerns of a nuclear family. **(1)**
- Who, according to the passage, is responsible for them? **(1)**
